

Cloud Hosting

Do you have smart accessibility?

Run your computing environment on our NZ cloud, store your data on our infrastructure and access it anywhere virtually. You can pay for it on a monthly basis, without investing in your own hardware or software. A smart way to safely operate, store, share and grow as a business.

Our solutions lie in our questions. Where are you heading? What are your challenges? We meet your IT needs in the best possible way by getting to know your business. Being vendor neutral means your bigger picture is our greatest interest.

IAAS / SAAS

Infrastructure or software as a service, you can rent computing resources, storage space and licencing monthly.

Compute / Storage

Infrastructure as a service, have your virtual servers hosted on our hardware.

Microsoft SPLA Licensing

Access and rent operating system and application licencing from us.

Data Centre / Colocation

Store your equipment in our monitored, regulated and secure data centres. Utilise our Rackspace, Handovers and Smart Hands Available.

Email / Anti-spam

We can protect you against spam, phishing, and other malicious attacks via your email.

We own it

Your end-to-end IT provider and partner: We own our network and any problems that arise. Big enough to take care of it yet small enough to care about you and your business, we offer six all-encompassing areas of IT solutions.

How can we help?

Book a chat and we'll be over with the coffee.
